

SolPrint Plastic Packaging Tax Support

HMRC have introduced a new Plastic Packaging Tax (PPT) which will apply to plastic packaging manufactured in, or imported into the UK, that does not contain at least 30% recycled plastic.

The tax will not apply to any plastic packaging which contains at least 30% recycled plastic, or any packaging predominantly plastic by weight.

The tax will only apply to manufacturers and importers who exceed 10 tonnes of plastic packaging per year.

As a result of the above companies will need to report on usage in a period and pay the relevant tax due.

It is therefore important to include a charge on client quotes to include the PPT where applicable.

SolPrint has been enhanced to allow for materials to be flagged as PPT applicable and the amount of the overall material that is applicable.

The SolPrint estimating automatically calculates the weight of any plastic packaging contained in a quote and applies the appropriate tax.

The client quote produced will therefore include any PPT due covering your business liability.

A report is provided to extract the plastic packaging usage details for jobs produced in a period and the PPT due calculated for HMRC submission.

If you would like to find out more information on the PPT HMRC requirements and how SolPrint can support your business here please contact us directly.
