

## Clearprint Solutions implement the SolPrint MIS

Clearprint Solutions is a Sussex print and design company that serves clients in London and across the Southeast. They have decades of experience in delivering complex campaigns for a wide range of organisations and work with over 30 UK-based charities.

Providing value for money and offering exceptional print solutions are of paramount importance to Clearprint Solutions and their existing MIS could not fulfil their needs in today's demanding market.

After a demonstration led by Peter Griffin, they knew that the SolPrint MIS would benefit all aspects of their business and improve their operational functions.

The SolPrint team customised the MIS system to suit their business and the flexible license options provide excellent value for money.

Tim Nisbet, Managing Director of Clearprint Solutions responded when he was asked what the business uses SolPrint for said,

***"SolPrint has made every operation quicker, from a quote to an invoice and everything in between. The reports are good and help us to see every aspect of our business and we can run SolPrint from anywhere we have internet access."***

***"The System was bespoke changed to how we wanted it and the Solprint Team always seem to add everything we ask for. We love to use the system it has made our life so much better."***

When we asked if Tim would recommend SolPrint to others?

***"Yes, we certainly would, it gets better the longer you use it as the search functions are great for repeat work and then so easy for new quotes and jobs."***
